Software release history AutoCAD is still in development. There are new features announced by Autodesk every year, such as: Release 2009: Release 2009 introduced simplifications in drawing creation and editing, enabling quick drawing creation by using templates and simplified drawing creation through Dynamic Input, which allows creation of complex drawings by using blocks. Release 2006: Release 2006 introduced AutoCAD 2D/3D integrated development environment for web and mobile development. It allows users to create and run 2D or 3D web pages and applications by using the AutoCAD interface. Release 2005: Release 2005 introduced multiuser and network support for the DesignCenter. Release 2004: Release 2004 introduced a number of improvements to creation, editing, linking, search, file formats, color, and rendering. Release 2003: Release 2003 introduced Project Server and Task Management functionality, allowing the creation of a single project that incorporates changes by the entire organization. Release 2002: Release 2002 introduced "Navigation-Based Conventional Drafting" which uses customized navigation based on the user's discipline. This functionality allows users to have their drawings organized in a way they want, instead of a way the program assumes is best for the user. Release 2001: Release 2001 introduced "Automatic Conventional Drafting", a system to automatically analyze a drawing and then draw similar drawings. Release 2000: Release 2000 introduced "Multiuser", which allows two or more users to work on the same drawing at the same time, and "FlexDraw", a small-footprint drawing system that can fit in a pocket or in an electronic device. Release 1999: Release 1999 introduced "Portals", which enables communication among applications in addition to the usual data transfer. Release 1998: Release 1998 introduced the "DraftSight" user interface to allow users to collaborate on drawing modifications and updates. Release 1997: Release 1997 introduced "Function Keys", which allows users to customize the shortcuts that they use most frequently. Release 1996: Release 1996 introduced "Dynamic Input", which allows the creation of complex drawings by using blocks. Release 1995: Release 1995 introduced "MyGeometricDrawings", which provides a data repository for users' drawing records. Release 1994: Release 1994 introduced "Dictated Drawing", which allows users to draw on a clean sheet of paper and to input their drawing to a drawing, without modifying the original drawing file. Release 1993: Release 1993 introduced "Document Object Model", which enables software developers to access the entire contents of a1d647c40b
