The toolbar of "Cropper" application is a very simple one-button interface, consisting of an image editor that is itself colored for image editing. The choice of the tool is straightforward and consists of 50 different objects, which can be composed of various shapes including circles, squares, rectangles, ellipses, ovals, ellipses, stars and rectangles. The first object will be in the center of the image and you can "collapse" or "expand" it by moving the object to either the left or right of the canvas' center. The size of the selected object can be expanded or reduced from the center of the image by moving it to the top left corner or to the bottom right corner of the canvas respectively. The width and height of the object can be stretched in proportion to the aspect ratio of the image. After dragging one of the 50 objects, you will get a preview of the results in the image editing window. If you go back to the main window, you will see a selection of all objects in the image (as shown on the left side of the screenshot below). You will have more than enough objects to correct colors, sharpen and blur the image and the selection box is used to move the image objects.
