We have the most extensive and trusted live webinar software on the market. Save money, time and energy and focus on the presentation instead of the technology. Award winning Video Conferencing software that brings conference call meetings to life. Over the last 20 years, we have changed the way business is done. MSW is an excellent service for our companies. We were looking for a way to make a conference call using our web cam and microphone. It took us a few days to find this software. MSW made our conference call using our web cam and microphone. It was very easy to use. We would not go back to using telephone lines! These other reviews are simply not true. Ms Win Web Conferencing is one of the most elegant and user friendly products I have ever used. The software is easy to install, configure and use, as well as very easy to upgrade if necessary. All of my colleagues have found it easy to use and even the most technically challenged person can be set up in a few minutes. The only web conferencing product we are looking at right now is win Web Conferencing. I love that it is free. The only thing is that our company is just small and we don't use this much. I was looking for a more robust product for our company. The support that win offers is great. I just recently got this, and was wondering how is it in comparison to other web conferencing tools? I'm a beginner, and was skeptical to use these types of software. But I tried it for the first time last week, and I was impressed by the result. It works very well and the price was reasonable. We are using Ms Win Web Conferencing right now, and we are very

What's New in the VidSpeak?

>VidSpeak is a software program that lets you chat with several people in the same time, using voice and video. >The interface of the program is pretty straightforward and therefore, it will be easy to use for any person, no matter how inexperienced they might be when it comes to computers. On the right side of the main window you can see the chat room in which you are currently logged in to, and a list with all the other people that are also there. The middle of the main screen displays what your web camera is capturing, while the menu bar with all the available options is presented on the upper side. >All you have to do in order to set up communication is select the bandwidth that you are using and log in. >The program is also customizable in the sense that the video capture settings can be changed in a lot of different ways. For example, the resolution can be set from 176x144px to 320x240px or 640x480px, in accordance with the quality and FPS ratio. >From the "Configure Webcam" panel, you can select the device you want to use, and also change the level of brightness, contrast, saturation, hue, white balance, gamma and sharpness. Moreover, the application enables you to configure the zoom, focus, exposure, tilt, pan and roll controls, as long as your camera supports these features. >To sum up, VidSpeak is a very helpful software application that enables you to create multipoint video conferences.

Description: BitRate is a powerful software utility for downloading and streaming music. The application lets you search and choose your favorite tunes, and then download them to your computer. It can stream music from online sources such as YouTube, Yahoo Music and Napster, as well as from CDs. Moreover, the application is also capable of adding tracks to your iPod, and also of detecting and converting ID3 tags. The program has an excellent interface and it is completely configurable, in terms of preferences and hotkeys. The interface of the software is very intuitive, and as a result, BitRate can be used by any person regardless of the level of computer proficiency they might have. You can also set up the program to search on your hard drive for tunes, or a specific artist. The interface of the application is also very straightforward, which makes it even easier for beginners. Moreover, BitRate has very good integration capabilities, so it is possible to set up automatic searches based on your iTunes library, or based on a specific genre. If you are an Apple user, BitRate also comes with an AppleScript module that lets you perform a lot of different operations. You can download and stream your favorite music through BitRate, but what makes the program even more appealing is the fact that it also enables you to add music to your iPod, which is perfect
