What's New in the Redshift GUI?

Just download this software and enjoy! 1.0 1.5 by Asomode 59 Downloads 6 / 10,168 Free 1,478 KB Software Review Redshift GUI is a software that helps you to adjust and find out your color temperature. It also is an excellent tool that helps you to find out the location of your machine. The Application Windows As you can see, the main window has a clear and minimal design. It is possible to access all the parameters through the menu, which is located in the upper right part of the window. The menu provides you with a quick way to access the different options, and it is quite easy to navigate around them. In order to find a specific option you need to click on the respective button or widget on the menu. The grid you can find in the middle of the main window is rather helpful for you to quickly filter a few options. If you do not know how to adjust the different options or how to find your location, you can access the tutorial by clicking on the associated button. The Settings Panel The settings panel contains the same widgets you see in the menu. You can find a quick way to access the different functions by clicking on the respective button. The most important thing about the settings is that it is possible to find your latitude and longitude using it. The Settings Panel The settings can be divided in two sections: the ones that are associated with monitor's color temperature, while the others are associated with the location. The first section has a slider bar, a day and night temperature, as well as the transition speed. The second section has a daytime and night temperature, and a couple of buttons that will help you to find out your latitude and longitude. The Menu The menu is divided into three tabs. On the first tab you will find the options that are associated with your monitor's color temperature. From there you can adjust the color temperature, as well as the transition speed. From the menu, you can also find the different options for your location. The second tab helps you to find out the latitude and longitude of your location. You can find out where you are by simply clicking on the respective button. The last tab is associated with the translations. The video tutorial The video tutorial is divided in three parts. The first one contains an introduction, while the other two explain how to adjust the different options. The Introduction If you wish to start using the software you need to click on the start button. The introduction explains the different options the software provides you with. The first section is associated with the adjustment of the color temperature. The next section explains how to find out your
