IDrive Portable With Product Key [32|64bit]

IDrive Portable is a portable edition of IDrive, the cloud backup program from Claria Software. It was designed as the portable version of the software, so you don't have to install it prior to use. Just extract its files to a folder on your hard disk and start the application. Once you do, you will be prompted to create an account, which requires only a free account. If you don't have one, you can create one for free. Aside from basic account creation, you can start using IDrive Portable right away by checking in with your account details. When you do, you will be prompted to select a folder for the backup job. Selecting one here will allow you to check out all the files and folders on your PC to be included in the backup. You can also go ahead and make a local backup. Here, you just need to select the output directory and the backup will begin. IDrive Portable takes care of everything automatically. After the job is complete, you can decide whether you want to use an existing backup set or create a new one. In the latter case, you will be asked for the selection of files to be included in the backup job. You can select one or multiple files. To finish things off, you can specify how you want to include directories and delete the selected objects from the backup set. All these features are accompanied by a search function, which can be used to check out files for specific content. Like the official application, IDrive Portable is completely free to use. User interface and features: The interface is extremely easy to use, giving you the ability to perform backups, restores and view log details with minimal effort. It also lets you create backups for any

files and folders on your computer, and makes it easy to check out details about the local backup and upload them to the cloud for free. The application has numerous features, making it compatible with all major platforms. It can be used on all desktop and mobile computers running Windows, Mac and Linux systems. Thanks to the cloud-based account, you can access the backup set from any device with internet access. You will be prompted to log in when you click on the link sent to you via email. The only thing that you need to have is a valid account. From this point on, all files and folders on the PC that you backed up will be easily accessible, which is a big advantage. It's a very handy feature that you may find indispensable for common tasks like

IDrive Portable License Code & Keygen
