Description: Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. The developer should also leave the game alone for a while and play on the internet, instead of adding in the game so many strange adds and spots. Adding to the game so much content to raise the game even more. It's not easy to find those and use them. For example, today the game started giving me, when the game starts you get an ice cream on the screen. You're not supposed to have ice creams. I used it and after that there's just the ice creams every time you start up the game. Also, the other games I saw on the forum, the the trainer the game sometimes closes even before it can be used.
